

Flowpack Calculator — Old vs New Calculation

Change: +1 click per kg of candy foil (new candy type) + 5 safety clicks | Generated June 11, 2026

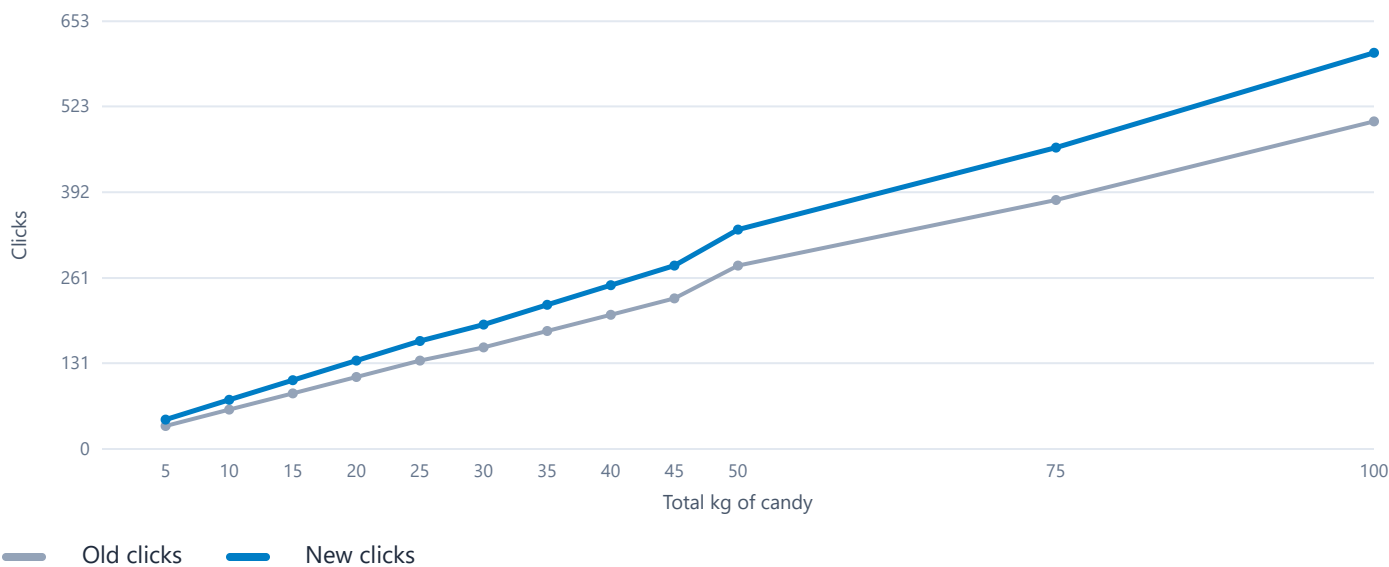

OLD formula

```
clicks = ceil( baseClicks )
meters = round( clicks × m/click ÷ 5 ) × 5
```

NEW formula

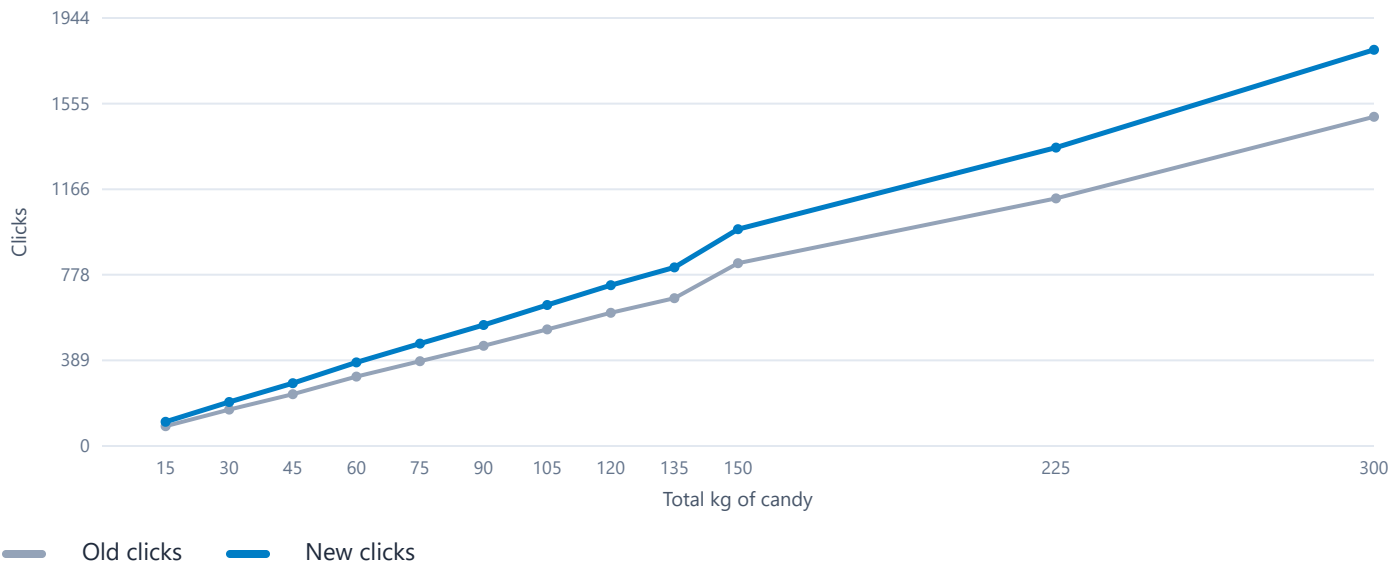

```
clicks = ceil( baseClicks + totalKg × 1 + 5 )
meters = round( clicks × m/click ÷ 5 ) × 5
```

Mode: "3 ens FP" (same design on all 3 lanes)

Total kg	Old clicks	New clicks	Δ clicks	Old meters	New meters	Δ meters
5	35	45	+10	25	30	+5
10	60	75	+15	45	55	+10
15	85	105	+20	70	85	+15
20	110	135	+25	95	115	+20
25	135	165	+30	115	140	+25
30	155	190	+35	140	170	+30
35	180	220	+40	165	200	+35
40	205	250	+45	190	230	+40
45	230	280	+50	210	255	+45
50	280	335	+55	260	310	+50
75	380	460	+80	360	435	+75
100	500	605	+105	475	575	+100

Mode: "1 FP pr lane" (mix mode — table lookup at totalKg ÷ 3)

Total kg	Table lookup kg	Old clicks	New clicks	Δ clicks	Old meters	New meters	Δ meters
15	5	90	110	+20	80	100	+20
30	10	165	200	+35	150	180	+30
45	15	235	285	+50	220	265	+45
60	20	315	380	+65	295	355	+60
75	25	385	465	+80	360	435	+75
90	30	455	550	+95	435	525	+90
105	35	530	640	+110	505	610	+105
120	40	605	730	+125	580	700	+120
135	45	671	811	+140	645	780	+135
150	50	830	985	+155	795	945	+150
225	75	1.125	1.355	+230	1.090	1.315	+225
300	100	1.495	1.800	+305	1.440	1.735	+295

In "1 FP pr lane" mode the interpolation table is looked up at totalKg ÷ 3, while the extra clicks are based on the full total kg.
